

## Parking lot USB exercise

---

<b>Contents</b>	<p>Write <b>2-3 sentences</b> about the types of information found on this device.</p> <p>Certain documents seem to contain sensitive personal information that Jorge would prefer to keep private. Moreover, the work files contain personally identifiable information (PII) of other individuals, and they also include details about the hospital's operational activities.</p>
<b>Attacker mindset</b>	<p>Write <b>2-3 sentences</b> about how this information could be used against Jorge or the hospital.</p> <p>The timesheets may offer valuable information to a potential attacker regarding the individuals with whom Jorge collaborates. This data could encompass both professional and personal details that could be exploited to deceive Jorge. As an instance, a malicious email might be crafted to appear as if it originates from a colleague or a family member, using this acquired information.</p>
<b>Risk analysis</b>	<p>Write <b>3 or 4 sentences</b> describing technical, operational, or managerial controls that could mitigate these types of attacks:</p> <p>Enhancing employee awareness about such attacks and educating them on how to respond when encountering a suspicious USB drive is necessary to mitigate the risk of security incidents. Implementing routine antivirus scans would also be effective. Additionally, bolstering the defense mechanism may involve technical controls, such as disabling Auto Run on company PCs to prevent automatic execution of malicious code when a USB drive is inserted.</p>
